

STATE PROFILE REPORT
03.11.2022

ARIZONA

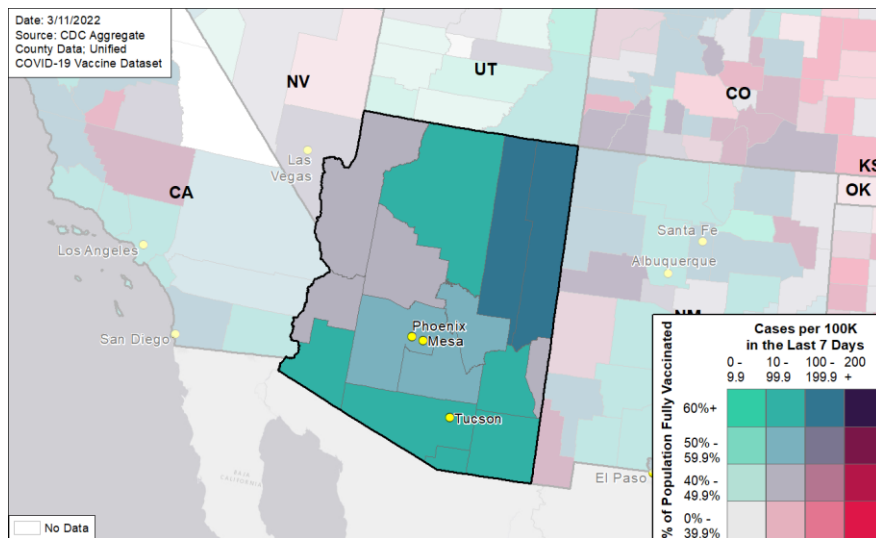

STATE SYNOPSIS

| | LAST WEEK | CHANGE FROM PREVIOUS WEEK |
|--------------------------------------------------------|------------------|------------------------------------|
| RATE OF NEW COVID-19 CASES PER 100,000 | 90 | -10% |
| NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE | 4.5% | -2.4% |
| NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS | 5.1 | -25% |
| RATE OF NEW COVID-19 DEATHS PER 100,000 | 5.2 | +446% |
| PEOPLE RECEIVED AT LEAST 1 DOSE | 5,222,421 people | 71.7% of total pop. |
| PEOPLE 5-11 RECEIVED AT LEAST 1 DOSE | 209,079 people | 32.5% of 5-11 pop. |
| PEOPLE 12+ RECEIVED AT LEAST 1 DOSE | 5,012,387 people | 80.8% of 12+ pop. |
| PEOPLE FULLY VACCINATED | 4,396,493 people | 60.4% of total pop. |
| PEOPLE 12+ FULLY VACCINATED | 4,254,169 people | 68.5% of 12+ pop. |
| PEOPLE 65+ RECEIVED BOOSTER | 659,450 people | 59.3% of fully vaccinated 65+ pop. |

SARS-CoV-2 Variants of Concern

- In the 4 weeks ending 2/12/2022, the following proportions of variants of concern were identified in [Arizona](#): Delta (B.1.617.2, AY.*) 0.4%, Omicron (B.1.1.529, BA.1*, BA.3) 97.9%, (BA.2) 1.7%

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

COVID-19 Community Levels (CCL) are now included in this report, a tool for understanding the county risk level and potential for health care system strain. County-level hospital data now uses a representative value mapped from Health Service Areas. HSAs are a single county or cluster of counties that are generally self-contained with respect to hospital care.

Starting 11/1/21, several states shifted to the use of report date; this change may result in fluctuations of weekly values and/or week-on-week changes.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://wwwn.cdc.gov/dcs/ContactUs/Form>.

COVID-19

ARIZONA

STATE PROFILE REPORT | 03.11.2022

| | STATE | STATE, % CHANGE FROM PREVIOUS WEEK | FEMA/HHS REGION | UNITED STATES |
|---------------------------------------------------------------------|---------------------|------------------------------------------|------------------------|------------------------|
| NEW COVID-19 CASES (RATE PER 100,000) | 6,549 (90) | -10% | 45,819 (89) | 249,565 (75) |
| NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE | 4.5% | -2.4%* | 2.5% | 2.7% |
| TOTAL NAAT VOLUME (TESTS PER 100,000) | 92,122† (1,266†) | +2%† | 1,374,040† (2,665†) | 6,636,346† (1,999†) |
| NEW COVID-19 DEATHS (RATE PER 100,000) | 382 (5.2) | +446% | 1,577 (3.1) | 8,382 (2.5) |
| CONFIRMED NEW COVID-19 HOSPITAL ADMISSIONS (RATE PER 100,000) | 741 (10.2) | -25% | 3,620 (7.0) | 20,650 (6.2) |
| CONFIRMED NEW COVID-19 HOSPITAL ADMISSIONS PER 100 BEDS | 5.1 | -25% | 4.2 | 3.0 |
| NUMBER OF HOSPITALS WITH SUPPLY SHORTAGES (PERCENT) | 1 (1%) | -50% | 17 (3%) | 198 (4%) |
| PEOPLE 5-11 INITIATING VACCINATION (PERCENT OF POPULATION) | 2,455 (0.4%) | -22.2% | 20,784 (0.5%) | 113,409 (0.4%) |
| PEOPLE 12+ INITIATING VACCINATION (PERCENT OF POPULATION) | 9,609 (0.2%) | -20.0% | 92,851 (0.2%) | 357,667 (0.1%) |
| PEOPLE 12-17 INITIATING VACCINATION (PERCENT OF POPULATION) | 1,392 (0.2%) | -8.0% | 11,266 (0.3%) | 53,667 (0.2%) |
| PEOPLE 18+ INITIATING VACCINATION (PERCENT OF POPULATION) | 8,217 (0.1%) | -21.8% | 81,585 (0.2%) | 304,000 (0.1%) |
| PEOPLE 65+ RECEIVING BOOSTER DOSE | 3,035 | -25.2% | 18,628 | 142,520 |

* Indicates absolute change in percentage points.

† Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

DATA SOURCES

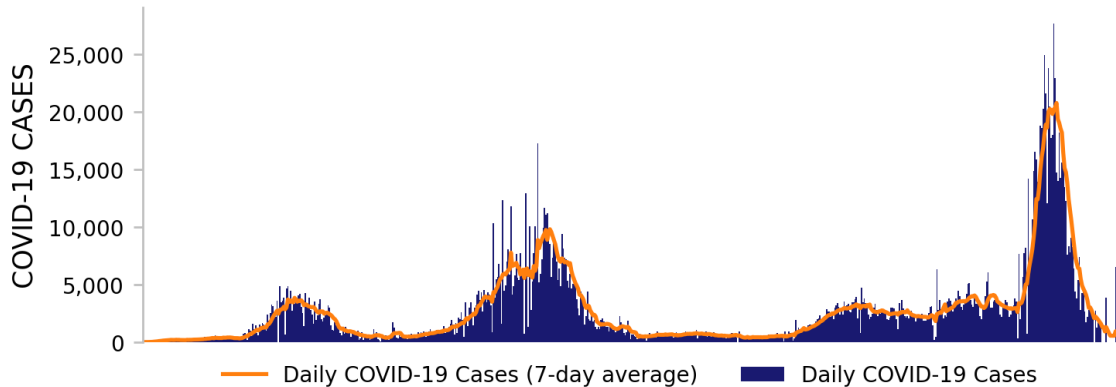

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 3/10/2022; previous week is from 2/25 to 3/3.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 3/8/2022; previous week is from 2/23 to 3/1. Test volume through 3/4/2022; previous week is from 2/19 to 2/25.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data are through 3/9, previous week is from 2/24 to 3/2.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 3/9/2022 for supplies.**Vaccinations:** [CDC COVID Data Tracker](#). Data include the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:11 EST on 03/11/2022. Data last updated 06:00 EST on 03/11/2022. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range.**METHODS:** Details available on last two pages of report.

PERCENT OF POPULATION FULLY VACCINATED

PERCENT OF 18+ POPULATION FULLY VACCINATED

DATA SOURCES

County reporting completeness for Arizona is 97.7%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:11 EST on 03/11/2022. Data last updated 06:00 EST on 03/11/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine.

METHODS: Details available on last two pages of report.

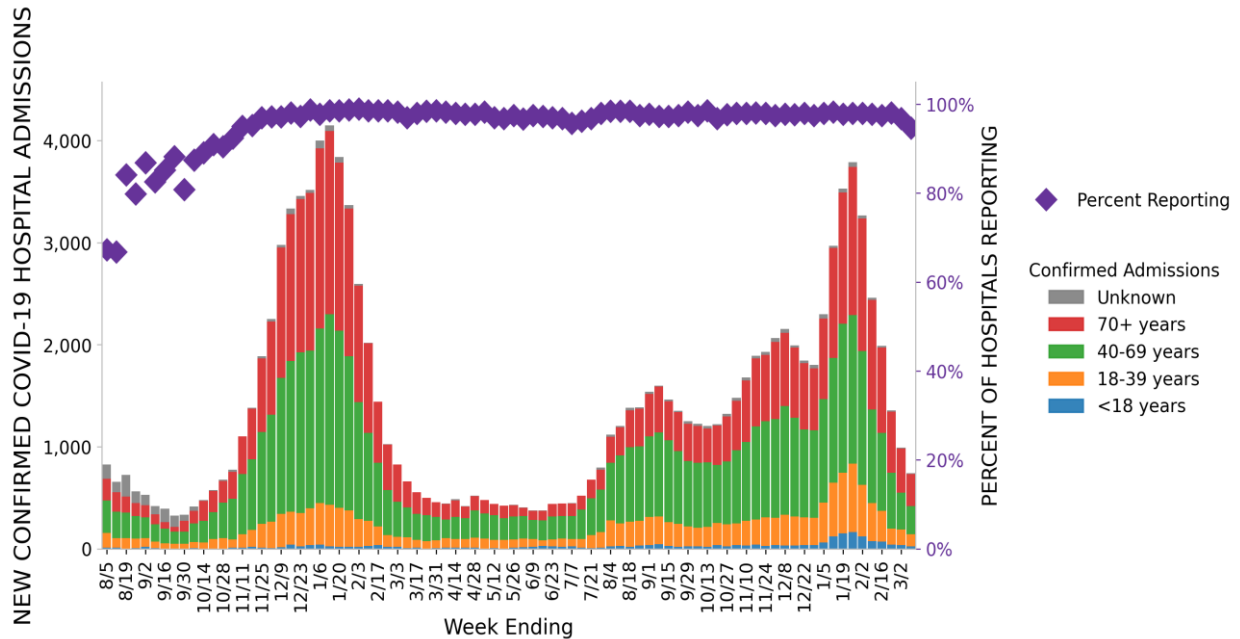

ARIZONA

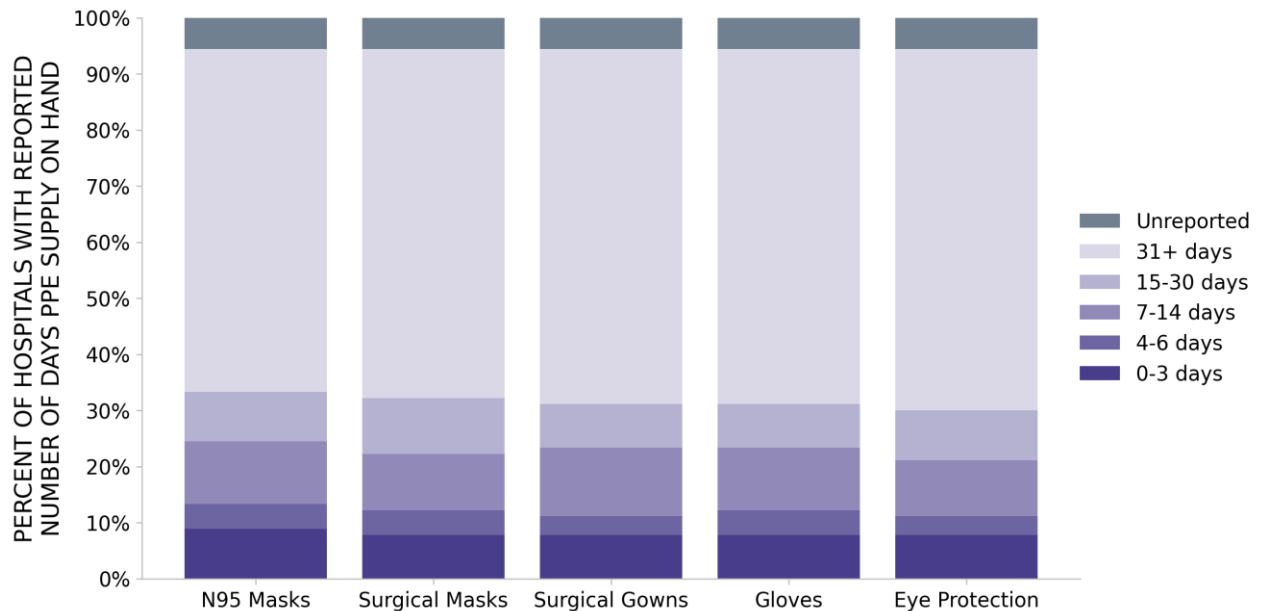

STATE PROFILE REPORT | 03.11.2022

90 hospitals are expected to report in Arizona

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data are through 3/9/2022.

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 3/9/2022.

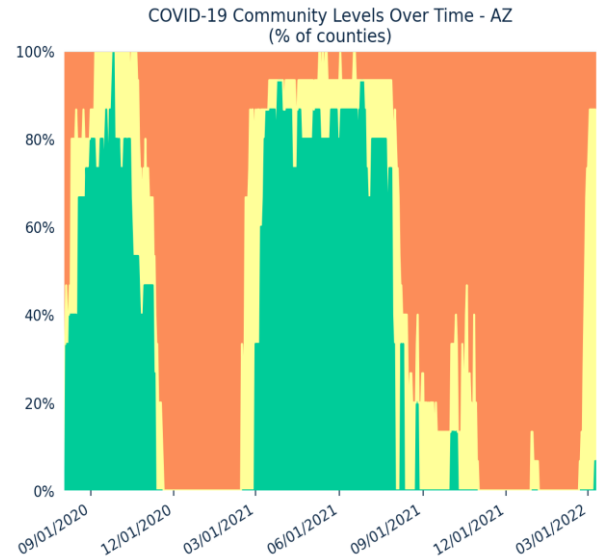

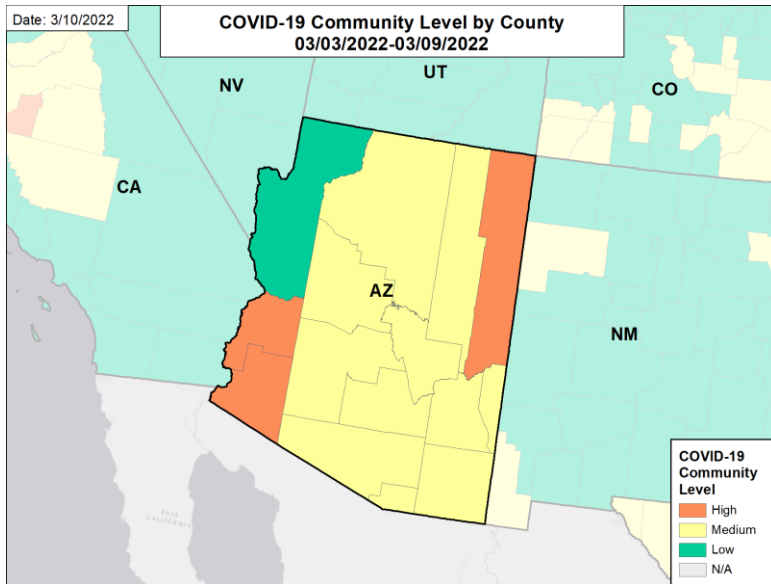

METHODS: Details available on last two pages of report.

STATE PROFILE REPORT | 03.11.2022

COVID-19 COMMUNITY LEVEL BY COUNTY

COUNTIES BY COVID-19 COMMUNITY LEVEL

| CATEGORY | LOW | MEDIUM | HIGH |
|------------------------|--------|---------|--------|
| # OF COUNTIES (CHANGE) | 1 (↑1) | 11 (↓2) | 3 (↑1) |

All Low Counties: Mohave

All Medium Counties: Cochise, Coconino, Gila, Graham, Greenlee, Maricopa, Navajo, Pima, Pinal, Santa Cruz, Yavapai

All High Counties: Apache, La Paz, Yuma

DATA SOURCES

Maps and figures reflect 7-day average of data from 3/3-3/9 (cases), 3/2-3/8 (hospital data). Metro areas and counties are listed in alphabetical order.

Note: Most recent days may have incomplete reporting.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 3/9/2022.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 3/8/2022.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details available on last two pages of report.

| PEOPLE RECEIVED BOOSTER DOSE | 95,739,353 44.2% of fully vaccinated total pop. | PEOPLE 65+ RECEIVED BOOSTER DOSE | 32,482,323 66.7% of fully vaccinated 65+ pop. |

DAILY NATIONAL COUNT OF VACCINE DOSES ADMINISTERED BY DATE OF ADMINISTRATION

DATA SOURCES

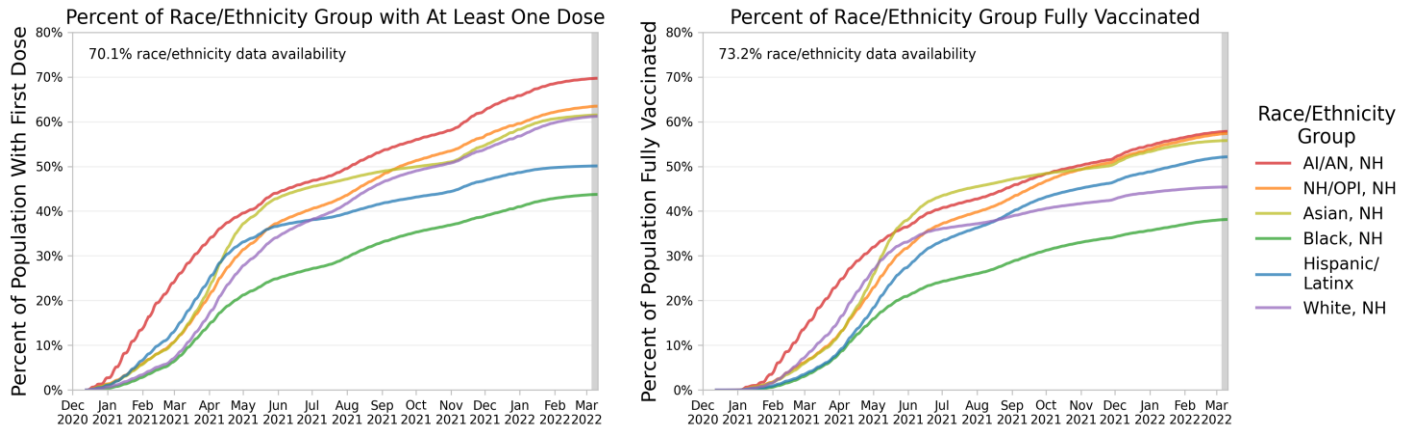

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:11 EST on 03/11/2022. Data last updated 06:00 EST on 03/11/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter purple coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

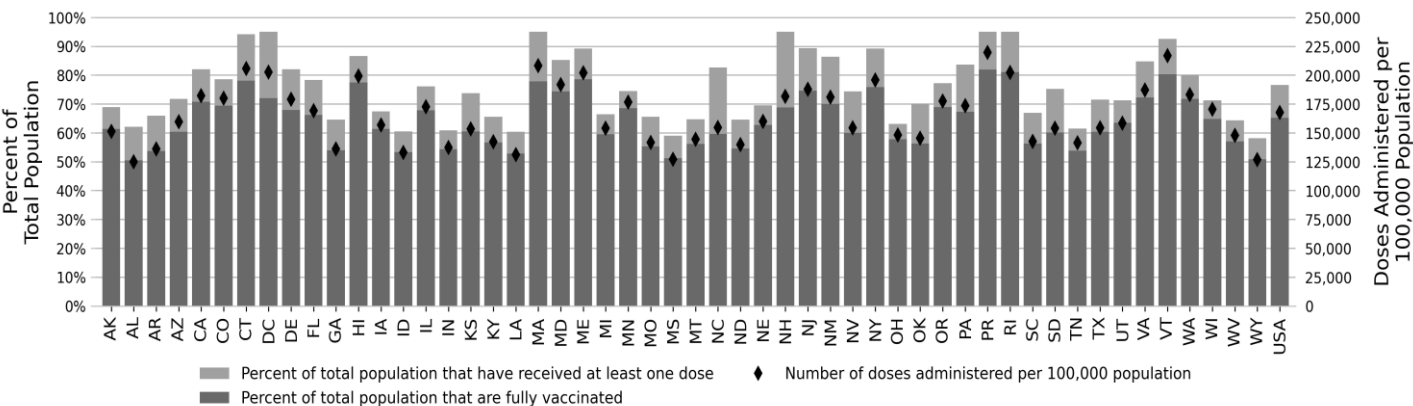

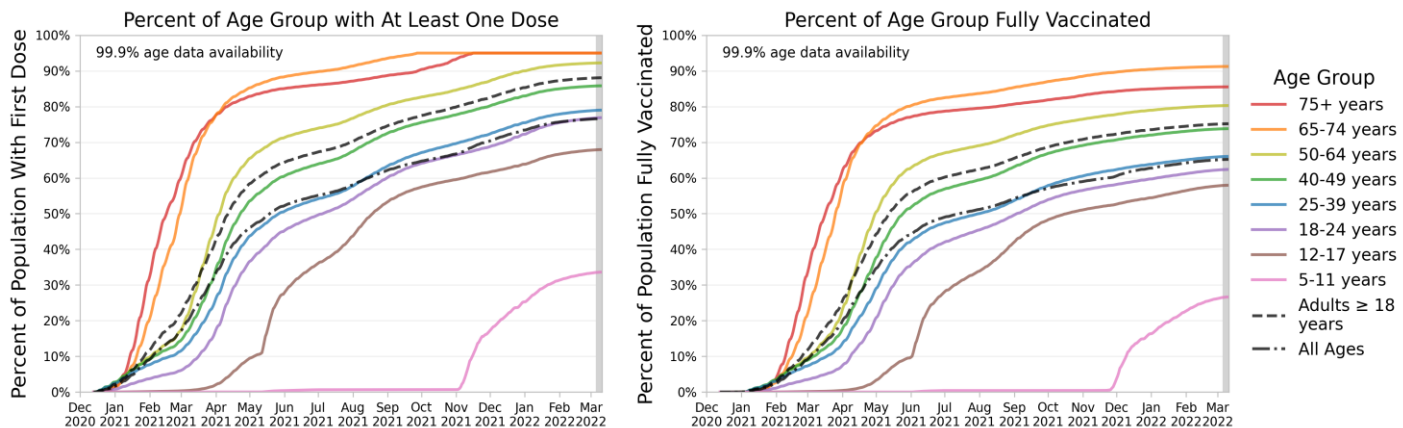

National Picture: Vaccinations

NATIONAL SUMMARY OF VACCINATIONS BY RACE/ETHNICITY

NATIONAL SUMMARY OF VACCINATIONS BY AGE

DATA SOURCES

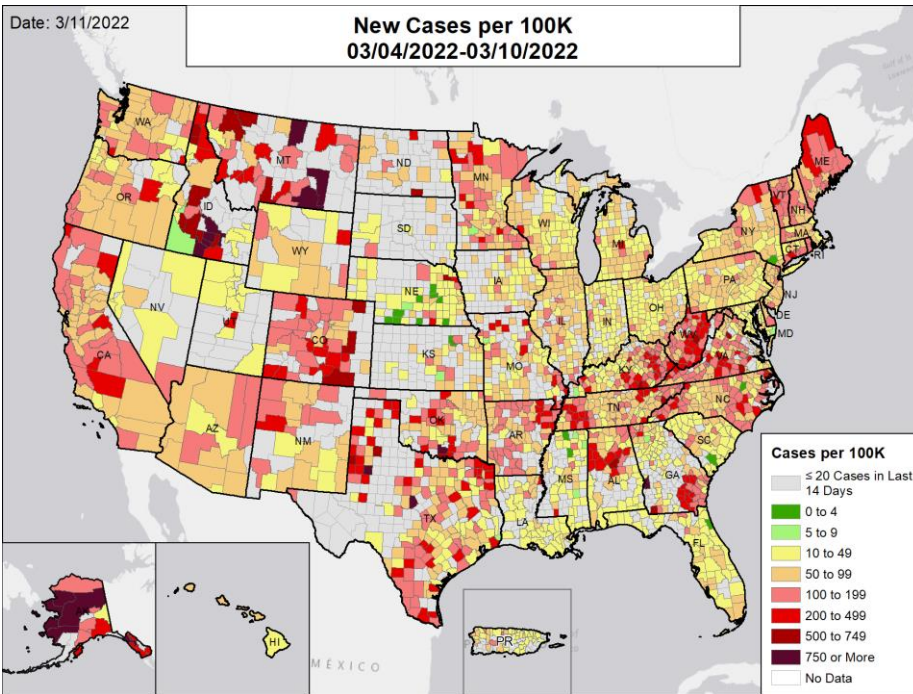

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:11 EST on 03/11/2022. Data last updated 06:00 EST on 03/11/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Race/Ethnicity data were available for 70.1% receiving at least one dose and 73.2% fully vaccinated. Age data were available for 100.0% receiving at least one dose and 100.0% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latinx, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

METHODS: Details available on last two pages of report.

NEW CASES PER 100,000 IN THE WEEK:

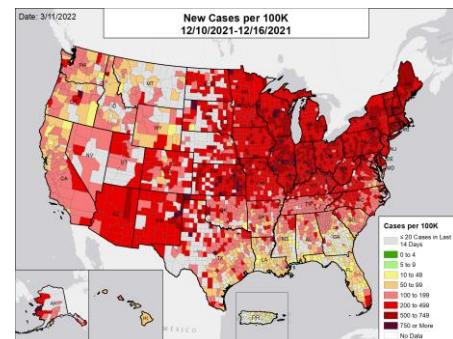

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

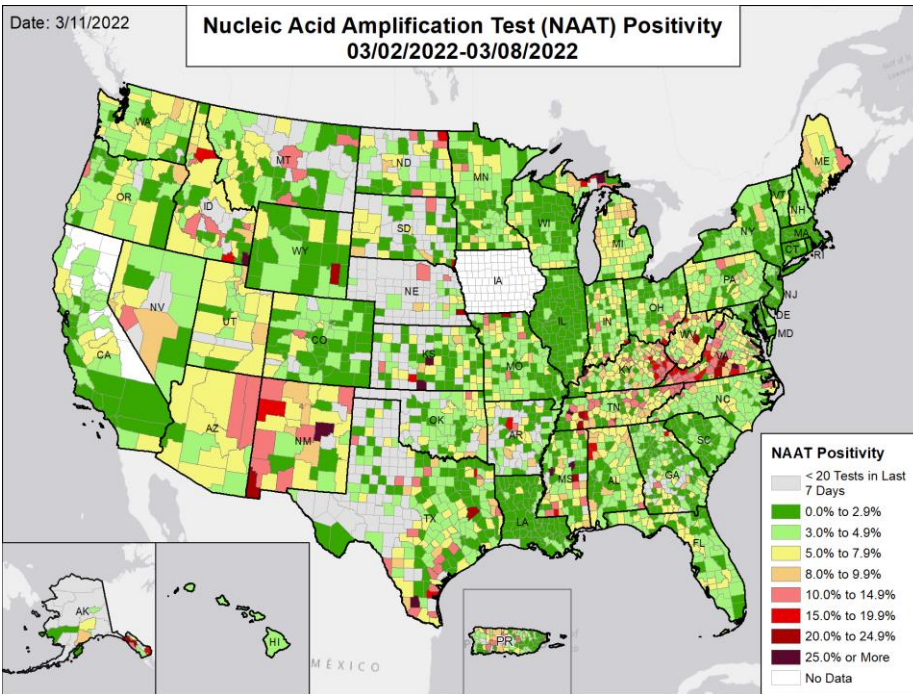

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. The week one month before is from 2/4 to 2/10; the week two months before is from 1/7 to 1/13; the week three months before is from 12/10 to 12/16. Due to data processing issues, Iowa county-level cases are over reported. Due to a change in reporting frequency from daily to weekly, Oklahoma has not yet reported county-level cases/deaths for the last week. Vermont recently allocated historical cases to their respective counties, causing an increase in county-level cases.

METHODS: Details available on last two pages of report.

NEW DEATHS PER 100,000 IN THE WEEK:

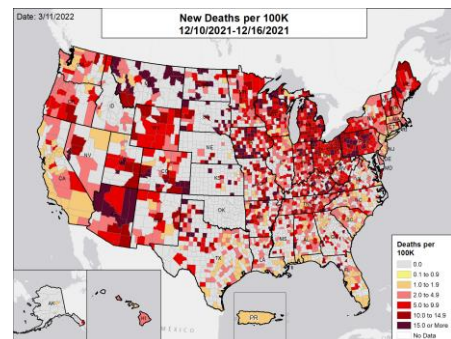

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

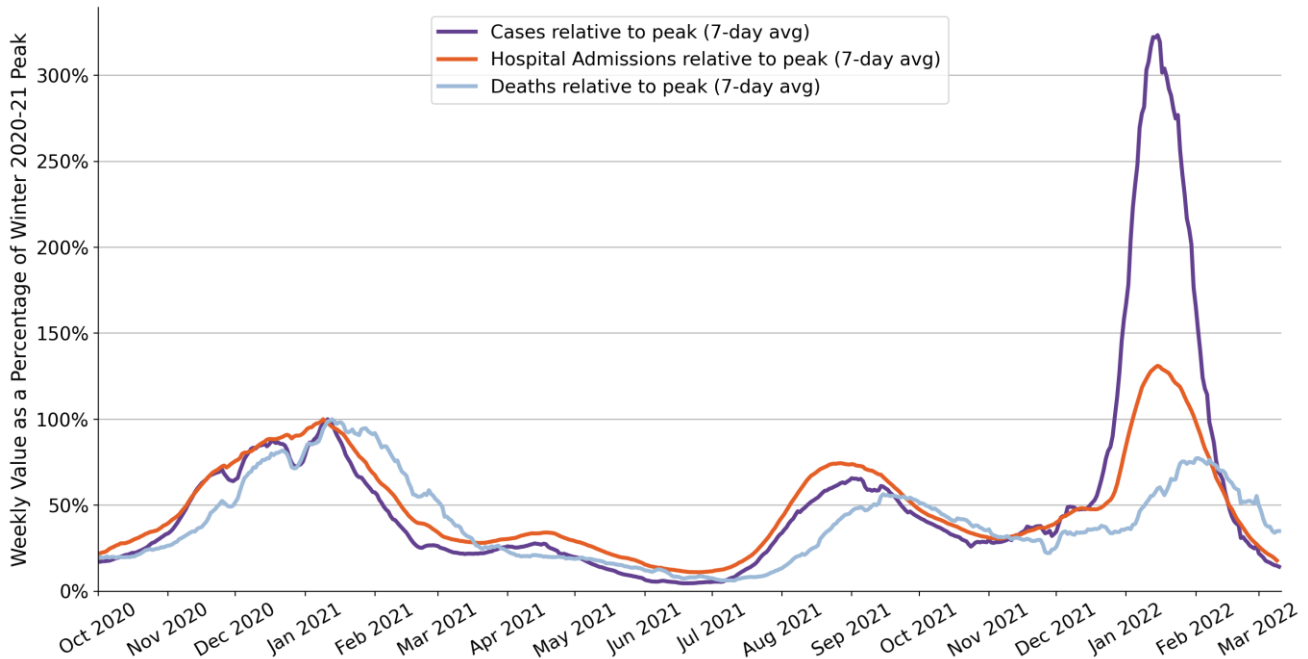

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Deaths: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. The week one month before is from 2/4 to 2/10; the week two months before is from 1/7 to 1/13; the week three months before is from 12/10 to 12/16. Due to a change in reporting frequency from daily to weekly, Oklahoma has not yet reported county-level cases/deaths for the last week.

METHODS: Details available on last two pages of report.

National Picture: Trends Compared to Winter 2020-21 Peak

| | Winter Peak | Delta Peak | Delta Peak Pct. of Winter Peak | Last Week | Last Week Pct. of Winter Peak |
|----------------------------------------------|----------------------|---------------------|--------------------------------|-----------|-------------------------------|
| Cases (7-day daily avg) | 250,294 1/11/2021 | 164,478 9/1/2021 | 66% | 35,652 | 14% |
| Hospital Admissions (7-day daily avg) | 16,497 1/9/2021 | 12,285 8/27/2021 | 74% | 2,950 | 18% |
| Deaths (7-day daily avg) | 3,420 1/13/2021 | 1,930 9/15/2021 | 56% | 1,197 | 35% |

Winter 2020-21 peak date range is Nov 1, 2020 to Feb 28, 2021; Delta peak date range is Aug 1, 2021 to Oct 31, 2021

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes. The peak value and associated date is calculated independently for cases, deaths, and hospital admissions, as the highest 7-day average value between the specific start and end dates for each peak.

Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 3/10/2022.

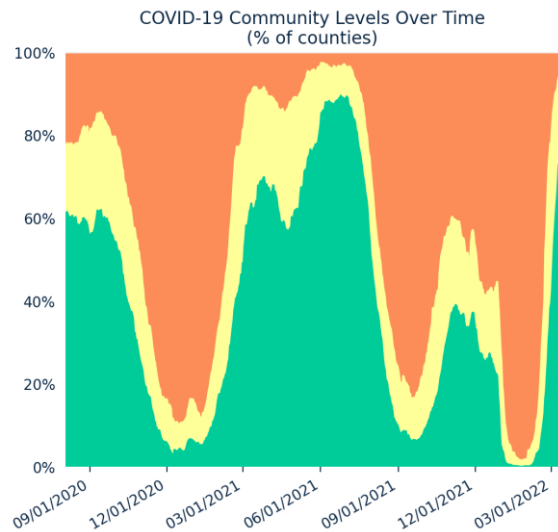

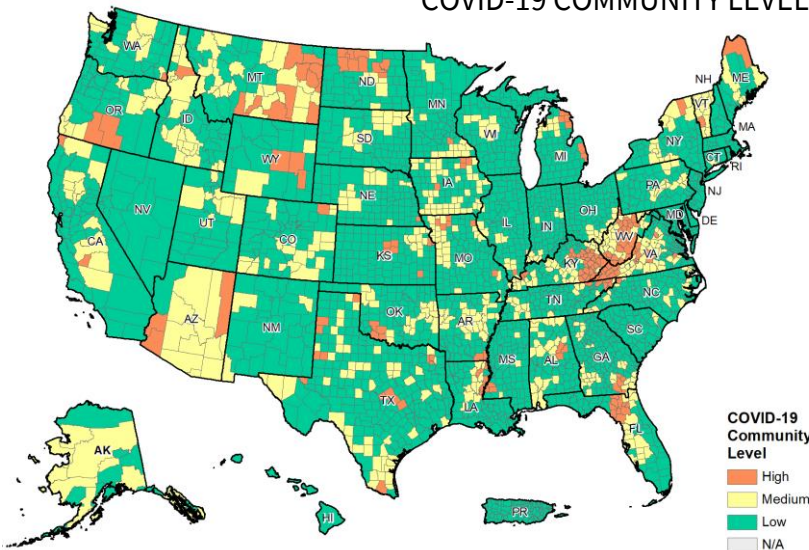

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Data are through 3/9/2022.

METHODS: Details available on last two pages of report.

National Picture: COVID-19 Community Level

COVID-19 COMMUNITY LEVEL BY COUNTY

COUNTIES BY COVID-19 COMMUNITY LEVEL COMPONENT METRICS

<200 CASES PER 100K

| ADMISSIONS PER 100K | <10.0 | 10.0 TO 19.9 | 20.0+ |
|---------------------------|----------------|----------------|--------------|
| # OF COUNTIES (CHANGE) | 2,366 (↑745) | 424 (↓391) | 89 (↓44) |
| % OF COUNTIES (CHANGE) | 73.5% (↑23.1%) | 13.2% (↓12.1%) | 2.8% (↓1.4%) |
| COVID INPATIENT OCCUPANCY | <10.0% | 10.0% TO 14.9% | 15.0%+ |
| # OF COUNTIES (CHANGE) | 2,796 (↑458) | 54 (↓156) | 12 (↓8) |
| % OF COUNTIES (CHANGE) | 86.8% (↑14.2%) | 1.7% (↓4.8%) | 0.4% (↓0.2%) |

200+ CASES PER 100K

| ADMISSIONS PER 100K | N/A | <10.0 | 10.0+ |
|---------------------------|-----|--------------|--------------|
| # OF COUNTIES (CHANGE) | N/A | 247 (↓115) | 94 (↓195) |
| % OF COUNTIES (CHANGE) | N/A | 7.7% (↓3.6%) | 2.9% (↓6.1%) |
| COVID INPATIENT OCCUPANCY | N/A | <10.0% | 10.0%+ |
| # OF COUNTIES (CHANGE) | N/A | 320 (↓161) | 21 (↓147) |
| % OF COUNTIES (CHANGE) | N/A | 9.9% (↓5.0%) | 0.7% (↓4.6%) |

COUNTIES BY COVID-19 COMMUNITY LEVEL

| CATEGORY | LOW | MEDIUM | HIGH |
|------------------------|----------------|----------------|--------------|
| # OF COUNTIES (CHANGE) | 2,343 (↑818) | 684 (↓534) | 193 (↓284) |
| % OF COUNTIES (CHANGE) | 72.8% (↑25.4%) | 21.2% (↓16.6%) | 6.0% (↓8.8%) |

DATA SOURCES

Maps and figures reflect 7-day average of data from 3/3-3/9 (cases), 3/2-3/8 (hospital data).

Note: Most recent days may have incomplete reporting.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 3/9/2022. Due to data processing issues, Iowa county-level cases are over reported. Due to a change in reporting frequency from daily to weekly, Oklahoma has not yet reported county-level cases/deaths for the last week. Vermont recently allocated historical cases to their respective counties, causing an increase in county-level cases.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 3/8/2022.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipios.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details available on last two pages of report.

DATA SOURCES & METHODS

STATE PROFILE REPORT | 03.11.2022

- Some dates may have incomplete data due to delays and/or differences in state reporting. Data may be backfilled over time, resulting in week-to-week changes between reports. It is critical that states provide as up-to-date data as possible. Figures and values may also differ from state reports due to differing methodologies. For more information, see [CDC COVID Data Tracker](#).
- All population values are vintage 2019 US Census data.
- Cases and Deaths:** County-level data are from a CDC-managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Data and week-on-week changes are as of 12:56 EST on 03/11/2022. Cases and deaths are generally shown by date of report. Some states periodically adjust their past data with CDC to show it by case date and death date, as determined by the state. Between adjustments, new cases and deaths continue to be shown by date of report. This can potentially lead to over-estimates of the week-on-week increases in cases or deaths. As of October 25, 2021, CDC no longer spreads aggregate COVID-19 case and death counts evenly over non-reporting days (i.e., smoothing), to avoid under-reporting of weekend averages.
 - As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting.
 - Puerto Rico deaths are shown at the territory level as deaths are not reported at the municipio level.
 - Due to data processing issues, Iowa county-level cases are over reported. Due to a change in reporting frequency from daily to weekly, Oklahoma has not yet reported county-level cases/deaths for the last week. Vermont recently allocated historical cases to their respective counties, causing an increase in county-level cases.
 - Due to a change in reporting frequency from daily to weekly, Oklahoma has not yet reported county-level cases/deaths for the last week.
 - Historical reports of cases and deaths — for which backfill dates are not available — that exceed 1% of the total new cases or deaths reported in the US that day have been excluded from state daily and weekly trends. However, these are still present in county-level data. Historical reports in the last two weeks (2/25/22 – 3/10/22) are:
 - Alabama cases: 2,654 on 3/4
 - Arizona deaths: -238 on 3/2
 - Connecticut cases: 2,211 on 3/7 and 972 on 3/8
 - Delaware cases: 316 on 3/10
 - Iowa cases: 4,522 on 2/28
 - Kentucky cases: 135 on 3/1
 - Nebraska cases: 21,852 on 3/1
- Testing:** The data presented represent viral COVID-19 laboratory diagnostic and screening test results — not individual people — and exclude antibody and antigen tests, unless stated otherwise. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods, which were always included in the testing data. CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe county-level viral COVID-19 NAAT result totals when information is available on patients' county of residence or healthcare providers' practice location. Because the data are deidentified, total NAATs are the number of tests performed, not the number of individuals tested. NAAT positivity rate is the number of positive tests divided by the number of tests performed and resulted. For test positivity, last week data are from 3/2 to 3/8; previous week data are from 2/23 to 3/1; the week one month before data are from 2/2 to 2/8. For number of tests, last week data are from 2/26 to 3/4; previous week data are from 2/19 to 2/25. HHS Protect data are recent as of 10:00 EST on 03/11/2022. Testing data are inclusive of everything received and processed by the CELR system as of 19:00 EST on 03/10/2022.
 - As of 8/31/2021, Washington has been experiencing technical issues. As a result, test positivity and test volume may be incomplete.
- Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. In addition, hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. The data presented represents raw data provided; we are working diligently with state liaisons to improve reporting consistency. Data are recent as of 10:40 EST on 03/11/2022.
- Hospital PPE:** Unified Hospitals Dataset in HHS Protect. This figure may differ from state data due to differences in hospital lists and reporting between federal and state systems. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data are recent as of 10:46 EST on 03/11/2022.
- COVID-19 Community Levels**
 - High:** Those counties that during the last week reported 200 or more cases per 100,000 population with either a percentage of staffed inpatient beds occupied by COVID-19 patients (7-day average) at or above 10.0% or 10.0 or more admissions per 100,000 population (7-day total); or fewer than 200 cases per 100,000 population with either a percentage of staffed inpatient beds occupied by COVID-19 patients (7-day average) at or above 15.0% or 20.0 or more admissions per 100,000 population (7-day total).
 - Medium:** Those counties that during the last week reported 200 or more cases per 100,000 population with a percentage of staffed inpatient beds occupied by COVID-19 patients (7-day average) below 10.0% and fewer than 10.0 admissions per 100,000 population (7-day total); or fewer than 200 cases per 100,000 population with a percentage of staffed inpatient beds occupied by COVID-19 patients (7-day average) between 10.0% and 14.9% and between 10.0 and 19.9 admissions per 100,000 population (7-day total).
 - Low:** Those counties that during the last week reported fewer than 200 cases per 100,000 population with a percentage of staffed inpatient beds occupied by COVID-19 patients (7-day average) below 10.0% and fewer than 10.0 admissions per 100,000 population.
 - N/A:** A county is N/A if hospital data is not available.
 - If the indicators suggest different levels, the higher level is selected. Previous week levels are computed based on current data. See [CDC Community Levels](#).
- Shortages:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Low supply is defined as a hospital reporting they are not able to maintain a 3-day supply of N95s, face masks, gloves, gowns, or eye protection. Data are recent as of 10:46 EST on 03/11/2022.
- Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:11 EST on 03/11/2022. Data last updated 06:00 EST on 03/11/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. COVID-19 vaccines available in the U.S. are authorized only for persons ≥5 years of age (Pfizer-BioNTech) or ≥18 years of age (Moderna and J&J/Janssen). Population denominators reflect the subset of the population of the corresponding age range when specified (e.g., 12+, 12-17, 18+, or 65+), otherwise the total population is used. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. CDC has capped the percent of population coverage metrics at 95.0%. These metrics could be greater than 95.0% for multiple reasons, including census denominator data not including all individuals that currently reside in the county (e.g., part time residents) or potential data reporting errors. The following states have ≤80% completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: VA (79%), VT (74%), and HI (0%).
- Variants:** Data from [CDC COVID Data Tracker](#). Variant proportions are based on representative CDC sequence data (NS3 + CDC-funded contract sequencing) collected over a 4-week period ending February 12, 2022 for states with at least 300 sequences. Proportions are calculated using empirical (unweighted) data, which are subject to change over time and will be updated as more data become available. Proportions of variants do not represent the total number that may be circulating in the United States and may not match cases reported by states, territories, tribes, and local officials. For states and jurisdictions not listed, CDC has insufficient genomic surveillance data for the specified time period. Data updated by 19:00 ET on 3/8. Data pulled 12:01 EST on 03/11/2022.

DATA SOURCES & METHODS

STATE PROFILE REPORT | 03.11.2022

Color threshold values are rounded before color classification

| Metric | Dark Green | Light Green | Yellow | Orange | Light Red | Red | Dark Red | Darkest Red | |
|----------------------------------------------------------------------------|------------|---------------|---------------|-------------|---------------|---------------|---------------|-------------|---------|
| New cases per 100,000 population per week | ≤ 4 | 5 – 9 | 10 – 49 | 50 – 99 | 100 – 199 | 200 – 499 | 500 – 749 | ≥ 750 | |
| Percent change in new cases per 100,000 population | ≤ -26% | -25% – -11% | -10% – 0% | 1% – 10% | 11% – 99% | 100% – 999% | ≥ 1000% | | |
| Diagnostic test result positivity rate | ≤ 2.9% | 3.0% – 4.9% | 5.0% – 7.9% | 8.0% – 9.9% | 10.0% – 14.9% | 15.0% – 19.9% | 20.0% – 24.9% | ≥ 25.0% | |
| Change in test positivity | ≤ -2.1% | -2.0% – -0.6% | -0.5% – 0.0% | 0.1% – 0.5% | 0.6% – 2.0% | | ≥ 2.1% | | |
| Total diagnostic tests resulted per 100,000 population per week | ≥ 5000 | 3000 – 4999 | 2000 – 2999 | 1000 – 1999 | 500 – 999 | | ≤ 499 | | |
| Percent change in tests per 100,000 population | ≥ 26% | 11% – 25% | 1% – 10% | -10% – 0% | -25% – -11% | | ≤ -26% | | |
| COVID-19 deaths per 100,000 population per week | ≤ 0.0 | | 0.1 – 0.9 | 1.0 – 1.9 | 2.0 – 4.9 | 5.0 – 9.9 | 10.0 – 14.9 | ≥ 15.0 | |
| Percent change in deaths per 100,000 population | ≤ -26% | -25% – -11% | -10% – 0% | 1% – 10% | 11% – 25% | | ≥ 26% | | |
| Confirmed new COVID-19 hospital admissions per 100,000 population per week | ≤ 1.9 | 2.0 – 4.9 | 5.0 – 9.9 | 10.0 – 19.9 | 20.0 – 29.9 | | ≥ 30.0 | | |
| Change in new COVID-19 hospital admissions per 100,000 population per week | ≤ -26% | -25% – -11% | -10% – 0% | 1% – 10% | 11% – 25% | | ≥ 26% | | |
| Confirmed new COVID-19 hospital admissions per 100 beds | ≤ 1.0 | 1.1 – 3.0 | 3.1 – 5.0 | 5.1 – 10.0 | 10.1 – 15.0 | 15.1 – 20.0 | ≥ 20.1 | | |
| Change in new COVID-19 hospital admissions per 100 beds | ≤ -26% | -25% – -11% | -10% – 0% | 1% – 10% | 11% – 25% | | ≥ 26% | | |
| Percent of hospitals with supply shortages | ≤ 9% | | 10% – 19% | 20% – 29% | 30% – 39% | | ≥ 40% | | |
| Change in percent of hospitals with supply shortages | ≤ -10% | -9% – -5% | -4% – 0% | 1% – 4% | 5% – 9% | | ≥ 10% | | |
| Percent of Population Fully Vaccinated (State Level) | ≤ 49.9% | | 50.0% – 59.9% | | 60.0% – 69.9% | | 70.0% – 79.9% | | ≥ 80.0% |
